**Important Note:** Medicine is an ever-changing science undergoing continual development. Research and clinical experience are continually expanding our knowledge, in particular our knowledge of proper treatment and drug therapy. Insofar as this journal mentions any dosage or application, readers may

rest assured that the authors, editors and publishers have made every effort to ensure that such references are **in accordance with the state of knowledge** at the time of production of the journal.

Nevertheless this does not involve, imply, or express any guarantee or responsibility on the part of the publishers in respect of any dosage instructions and forms of application stated in the journal. **Every user is requested** to examine carefully the manufacturers' leaflets accompanying each drug and to check, if necessary in consultation with a physician or specialist, whether the dosage schedules mentioned therein or the contraindications stated by the manufacturers differ from the statements made in the present journal. Such examination is particularly important with drugs that are either rarely used or have been newly released on the market. **Every dosage schedule or every form of application used is entirely at the user's own risk and responsibility.** The authors and publishers request every user to report to the publishers any discrepancies or inaccuracies noticed.

**Note to our Readers:** The publisher makes every effort to ensure correct delivery of the journal to which you have subscribed. However, it happens that subscribers omit to inform us of their new address on changing their residence or postal address. The German postal services are helpful in such cases by letting us know to where you have moved. If you do not wish them to do so, please tell us.
